EDUCATION

Pimpri Chinchwad University (PCU), Pune — **2023–2027**
Bachelor of Technology in Computer Science Engineering (AI & Data Science) — CGPA: 8.3/10

Vidya Valley, Pune — **2021–2023**
Higher Secondary Certificate (HSC) — Percentage: 76%

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn), SQL (CTEs, Window Functions), C++, Shell Scripting
- **Data Engineering:** ETL/ELT Pipeline Design, Schema Design (Star/Snowflake), MySQL, PostgreSQL, REST APIs
- **AI & Analytics:** Agentic AI, Prompt Engineering, LLM Automation, Statistical Modeling, EDA
- **Visualization & Tools:** Microsoft Power BI (DAX, Power Query), Tableau, MS Excel (VBA), Git/GitHub, Docker

WORK EXPERIENCE

Data Analyst Intern — **May 2026 – Present**
Krios Info Solutions Pvt. Ltd. — *Pune, India*

- Designed and developed enterprise dashboards in Tableau and Power BI for clients including Cummins India and Yazaki, converting complex business data into actionable KPI-driven insights.
- Worked as a Solution Architect, translating client requirements into scalable analytical solutions.
- Built Python/SQL data pipelines for data cleaning, transformation, validation, reporting and automated reporting workflows.
- Collaborated with clients and cross-functional teams to understand business processes and deliver tailored solutions.
- Automated recurring reporting and data workflows, improving efficiency and reliability.

PROJECTS

AI-Assisted ERP Workflow (Prototype — In Progress) — *Claude, n8n, workflow automation*

- Designing an ERP workflow in which students submit NOC/LOR requests and route them through a structured faculty-approval process
- Exploring a n8n agent workflow to support request handling and process automation.
- Planned data flow includes storing approved request details in a database for reporting and dashboard integration.

TrendPulse Real-Time Brand Intelligence Tool — **Live Demo: View Project**
Python, SQL, NLP, Streamlit

- Built a brand tracking tool correlating social media sentiment with sales data for real-time ROI analysis.
- Developed an automated SQL/Pandas ETL pipeline to quantify customer confidence metrics via NLP.
- Optimized performance by 40% using Streamlit caching for high-volume datasets.

Real-Time Stock Anomaly Detection System — **Live Demo: View Project**
Docker, Scikit-learn, Yahoo Finance API

- Engineered a live monitoring system using Z-Score algorithms to detect market deviations and outliers.
- Containerized the application with Docker and deployed a CI/CD pipeline via GitHub Actions and Render.
- Integrated Yahoo Finance API to process and visualize live ticker data (AAPL, TSLA) for 50+ concurrent users.

ACHIEVEMENTS

- **Finalist:** PROTECH 2025 National Level Project Competition at Symbiosis Institute of Tech.
- **Finalist:** Code4Society 3 Day Hackathon conducted via Samsung Innovation Campus (SIC).
- **Course:** Completed intensive Python & DSA training via Samsung Innovation Campus (SIC).

CERTIFICATIONS

- Data Analytics Job Simulation on Forage: Tata Group
- R Programming for Statistics and Data Science: Coursera
- AI For Everyone: DeepLearning.AI
- Career Essentials in Data Analysis: Microsoft
- Oracle Cloud Foundation AI: Oracle Foundation
